Hi Anwill,

I hope you're doing well.

I wanted to give you a quick update on our current project progress. We've completed most of the front-end development tasks and are now focusing on integrating the API connections. The testing phase is scheduled to begin early next week.

Could you please review the user authentication module and confirm that all login features are functioning correctly by Friday? Once that's done, we can proceed with the final round of testing before deployment.

Please let me know if you need any additional information or support. Thank you for your collaboration and consistent effort on this project.

Kind regards,
Zaid Theunissen
