

OBJECTIVE

As a skilled software developer, I aim to leverage my expertise in JavaScript, HTML, and CSS for building responsive web applications, along with Java for backend development and Python for data processing and automation. My expertise includes managing both SQL and Firebase databases efficiently. I utilize GitHub and GitLab for version control in collaborative projects. Additionally, I apply Power BI for data visualization and analysis to support data-driven decision-making. I seek to contribute to innovative solutions while continuing to enhance my technical skills and make a positive impact on the team's success.

SOFT SKILLS

- Always eager to learn.
- Brilliant problem analysis.
- High level of attention to detail.
- Manage time efficiently.
- Great at communicating.
- Deadline driven.

TECHNICAL SKILLS

- Programming Languages: Python, Java, TypeScript, HTML, CSS, JavaScript
- Database Management: Firebase, SQL
- UX/UI Design: Figma
- Version Control: GitHub, GitLab
- Data Visualization & Analysis: Power BI

EXPERIENCE

January 2025 – Current **Software Developer Intern**, Plum Systems, Cape Town

- Developed and maintained features using JavaScript on both frontend and backend.
- Built APIs and backend services with Node.js.
- Contributed to responsive web and mobile applications using React.js.
- Utilized Expo Go for testing across devices.
- Integrated and managed Firebase services for storing all application data, including images, videos, and other media using Firebase Storage.
- Participated in agile development practices including daily standups, sprint planning, and retrospectives.
- Wrote and maintained clean, well-documented code following team standards.
- Debugged and resolved bugs across frontend, backend, and database layers.
- Used GitLab for version control, code reviews, and continuous integration.

August 2022 – February 2023 **Recruitment Resourcing Administrator (Compliance)**, Teleperformance SA, Cape Town

- Creating, developing, delivering and continually improving processes which demonstrate compliance across the business.
- Facilitating regular meetings to communicate regulatory, governing, client and company information, improvements, strategies, any issues faced and plans.

- Examining new ideas and highlighting these two key personnel and strive to continuously improve and deliver innovative solutions to the business.
- Working with the recruitment team to proactively manage, forward plan, prioritize, implement and schedule all business improvement projects efficiently and timeously, ensuring that performance in every area meets client and company demands.
- Identify, report and record failures in accordance with contractual procedures, followed by investigating and resolving the underlying issues.
- Ensure the company complies with its outside regulatory requirements and internal policies.
- Ensure that the company functions in a legal and ethical manner while meeting its business goals.
- Proactively audit processes, practices and documents to identify weaknesses.
- Ensure that all internal as well as external recruitment audits are passed.

August 2021 – August 2022 **Operations Compliance Officer**, Teleperformance SA, Cape Town

- Conducting Covid 19 risk assessments and Covid 19 tracking to understand risk levels.
- Educating all new hire employees on not only our Global Essential Security Compliance Policies (GESCP), but also the impact on the organization if these policies aren't complied with.
- Responsible for ensuring that all GESCP breaches/Incidents are recorded and followed up with management so that remedial actions are taken.
- Responsible for reporting back to the business on current risk and compliance performance.
- Perform various administrative duties such as creating reports.
- Acts as contact person and liaison between department heads and senior management.
- Examining new ideas and highlighting these to key personnel and strive to continuously improve and deliver innovative solutions to the business.
- Analyzing the root cause of any existing risks, following through and ensuring a robust process is put in place to avoid or minimize any recurrence.

EDUCATION

January 2016 - December 2020

Matric Certificate, South Peninsula High, Cape Town

February 2023 - Current

Diploma in Applications Development, Cape Peninsula University of Technology
